

## MIDDLE & HIGH SCHOOL PROGRAMS

The Pamlico Sea Base offers many opportunities for both Middle and High School Grade students. All programs revolve around a hands-on learning experience appropriate to each age level. Students will discover new methods of learning, participate in group decision making, and experiential learning.

### **ECO Tours**

Sea Kayaking and Canoeing eco-tours along the creeks and tributaries of the Pamlico River will give students a new outlook on the natural area they live in. Students will have opportunities to see bear, deer, bald eagles, osprey and an abundance of waterfowl. As an added bonus they will build new skills in either sea kayaking or canoeing, which ever you choose. Half day or full day programs are available. Sea Kayaking option available only to High School students.

### **Ropes Course**

Utilizing a combination of hands on initiative games and our constructed elements, students rely on their communication, critical thinking skills, leadership, teamwork and trust to overcome a variety of unique challenges. Students will not be participating in activities that require ropes and harnesses. Half day or full day programs are available.

### **The EDGE**

The EDGE is a team program that mimics an adventure race. Students will be separated into competitive teams to complete a challenge course. Events may include racing, navigation, puzzles, and interactive academic test. All events will be designed to meet your needs assessment goals. Themes may range from communication and teamwork to planning and resourcefulness.

### **Geocache**

After learning the basics of topographical maps, compasses and GPS's, students will be sent in search of hidden markers utilizing these navigation tools. This activity will encourage teamwork and hands on application of a new skill. Half day or full day programs are available.

### **Leadership Development**

The leadership development courses will challenge students to develop their personal leadership style and group leadership skills in an interactive environment. Development workshops are Ideal for student government, leadership clubs, or students with leadership responsibilities in other groups and school clubs. Courses include real world application of leadership methods.

### **Overnight Treks**

Take students on a remarkable adventure. Treks are available as a single overnight trip or a multi-day trip along the outer banks or local rivers. The overnight trek is a great resource for teachers who want to expose students to new learning environments or science teachers in search of the ultimate hands-on classroom. All of the above programs are available on the overnight treks. Treks can also offer an outside classroom for teachers who accompany the trek, catalyst for group discussion and opportunities for individual leadership. Overnight camp outs at the base camp are also available.

### **Customized Programs**

The programs listed above are just a small introduction to the vast resources available to your students. We understand that no two schools will want the same program. You may mix and match the above programs or we can build an entirely new program for you. Contact us today to begin building your unique experience.
