This is a great opportunity for Scouts to experience the excitement of a PWC in a safe and controlled environment. During the course of this program Scouts will be exposed to the proper and safe handling of PWC. The class schedule will resemble a Motor boating Merit Badge program. Scouts will be introduced to safety, basic skills, and knowledge of the craft before actually operating it. Boater Safety and Education are the two basic principles governing this program. Course will be adjusted on Friday night based on the units arrival time. The program will conclude on Sundays at 10:00 am.
